What's Emerging?

The latest news and information ...

Published by Emergent Futures Pty Ltd

July 2010

Welcome to the end of July edition of What's Emerging.

Welcome to the end of July edition of What's Emerging. We hope that you all survived the end of financial year rush and are now powering ahead. In the next four weeks Paul is presenting to the Principals Association Conference in Qld, The Big Conversation in Echuca, and the Aquatics and Recreation Conference in Melbourne. Keep an eye on our website for the details and the presentations will be up on the site after we have made them.

Cheers

Paul Higgins, Sandy Teagle, Kim Stewart, Anitha Mendonca, Syed Muqthar, and Samantha Kyle-Little

What we are writing about

Due to the fact that Paul has been on holidays and Sandy is still away on maternity leave (although she is doing one project from home) we do not have an article or book review for this newsletter.

Business Tips

"Our business tips are in our main newsletter and link to the download page.

LED light turns your iPhone 4 or Android phone into an LED flashlight

LED flashlights are excellent, low energy devices that can put out serious light. Several phones—free iPhone/Android app LED Light turns your phones's LED into a flashlight. Works really well. [Read More...](#)

Five services worth checking out in Evernote trunk, a marketplace for Evernote add-ons

We use Evernote (www.evernote.com) as an organising and clipping service from the web and our mobiles and we highly recommend it. Now they have a market for add ons. Check it out if you are interested in a service that can remember what you saw, photographed or thought and make it searchable. [Read More...](#)

TouchpadPal 1.1

When you are typing a text on your laptop and your thumb accidentally brushes the touchpad, this leads to change the position of the cursor in your document. Touchpad Pal is utility for Windows XP/Vista/7 that solves this problem. It will automatically disable touchpad when you are typing text. [Read More...](#)

Top 25 Android apps: The best of the best

The Android Market may not have as many apps as the iPhone App Store yet, but there are still enough to be overwhelmed, and it's growing at a breakneck pace. [Read More...](#)

What's Emerging

Darpa's lab-grown blood starts pumping

Arteriocyte, the Cleveland, OH biotech firm that got \$1.95 million for the project, has sent off an initial shipment of their pharmed blood product to the Food and Drug Administration for an independent evaluation of the company's blood-growing process. [Read More...](#)

Canadian printer magazine abandons printed edition in favor of online

Canadian Printer, a leading printing industry trade publication in Canada, has announced that it will no longer be producing print editions. Instead, the publication will maintain an online presence and distribute bi-weekly e-newsletters to its readership. The company's intent is to publish one printed edition annually highlighting innovations in print. **Paul Higgins – How do you spell irony?** [Read More...](#)

Flu detector - tracking epidemics on Twitter

Flu detector uses tweets (i.e. posts on Twitter) to infer the flu rate in several UK regions. Results are verified with official Influenza like Illness (ILI) rates from the Health Protection Agency. [Read More...](#)

Electrolux design lab 2010 eight finalists

The 2010 brief asked industrial design students to consider how people will prepare and store food, wash clothes, and do dishes in the homes of 2050, when 74%* of the global population are predicted to live in an urban environment **Paul Higgins: Some interesting concepts that are well worth looking at.** [Read More...](#)

Evernote CEO Phil Libin's 3 steps to "Freemium" success

"Data analysis, referrals, advertising -- it was all kind of sleazy," says Evernote CEO Libin. "I wanted a clever product. I wanted that product to reach hundreds of millions of people. And I wanted 99% of them to be using it for free." [Read More...](#)

Are augmented reality textbooks on the horizon?

According to The New Media Consortium's 2010 Horizon Report, simple augmented reality is two to three years away. One of the possibilities for using that technology is in augmented reality textbooks, which essentially bring the animations in the opening credits of Reading Rainbow into the real world.
